

## JABRA, SPEECHLY & WORKABLE

### Bringing everyone together, safely

When COVID-19 posed challenges for the unique co-working service offered by Workable in Nairobi, Speechly interpretation software alongside premium audio and video devices from Jabra enabled them to continue allowing member businesses to connect virtually with colleagues in Africa and around the world.

**"We were clear from the start, the meeting room technology had to deliver value to our members, but it also had to be easy to use and easy to maintain."**  
*Samir Patel  
CEO, Workable*

### Adapting to COVID-19 challenges

Meeting spaces were identified as a key offering for businesses returning to the office environment post pandemic. This put the focus on Workable's collaboration solutions. When Workable looked at their meeting space offerings, they prioritised technology that enabled guests and residents to get a sense of added value from the time spent in their offices. It had to deliver a connected experience that could not be achieved anywhere else; either at home or in the city.

### A comprehensive solution

Speechly and Jabra Microsoft Teams Rooms enabled solutions offered Workable's members and guests to their building content and multi-lingual conversation, all with automated booking and one-touch join.

Workable are excited to welcome organisations across Kenya into their newest market leading offering which is open for booking directly through the Workable concierge.

### About Workable & Speechly

Workable's vision has been to support Nairobi's position as the future of business in Africa by offering a vastly superior workplace where innovators, business leaders and investors, both local and international, can comfortably and productively gather in a creative and sophisticated environment.

Speechly, an AI on-demand interpretation service, offered by FITTS integrates with Jabra certified devices and Microsoft Teams.

### THE PROJECT AT A GLANCE

Workable's meeting space is unique to the Nairobi office market connecting people working at home or in regional offices.

**Solution:** Speechly, Jabra PanaCast & Speak 710, Microsoft Teams Rooms, Lenovo ThinkSmart Hub
